

Geochemistry

EXPLORATION, ENVIRONMENT,
ANALYSIS

Editor: **G. E. M. Hall**, Geological Survey of Canada, Ottawa, Canada (e-mail: GHall@NRCan.gc.ca)

Associate Editors: **M. Leybourne** (GNS Science, New Zealand), **J. Carranza** (ITC, The Netherlands)

Production Editor: **Jessica Pollitt**, Geological Society Publishing House, Bath, UK (e-mail: jessica.pollitt@geolsoc.org.uk)

The journal is abstracted and/or indexed in *AGI's Bibliography and Index of Geology*, *Chemical Abstracts*, *Current Contents*, *Engineering Index*, *GEODATA*, *GeoRef*, *Mineralogical Abstracts*, *PASCAL/CNRS*, *GeoArchive*, *Thomson ISI database (SCIE, CC/PC & ES)*

CONTENTS - Volume 12, No. 2

Geochemical characteristics of mineral deposits: implications for ore genesis

E. J. M. Carranza (Guest Editor)

89

Geochemical and petrological characterization of gem opals from Wegel Tena, Wollo, Ethiopia: opal formation in an Oligocene soil

B. Rondeau, B. Cenko-Tok, E. Fritsch, F. Mazzero, J.-P. Gauthier, Y. Bodeur, E. Bekele, E. Gaillou & D. Ayalew

93

Petrological and geochemical characteristics of Egyptian banded iron formations: review and new data from Wadi Kareim

K. I. Khalil & A. K. El-Shazly

105

REE geochemistry of altered tectonites in the Huize base-metal district, Yunnan, China

H. Run-sheng, L. Cong-Qiang, E. J. M. Carranza, H. Baohong, H. Zhi-Long, W. Xue-Kun, H. Yu-Zhao & L. Li

127

The CO₂-rich magmatic-hydrothermal fluid of the Qiyugou breccia pipe, Henan Province, China: implication for breccia genesis and gold mineralization

N. Li, E. J. M. Carranza, Z. Ni & D. Guo

147

Mass changes during hydrothermal alteration associated with gold mineralization in the Astaneh granitoid rocks, western Iran

D. Esmaily, S. Z. Afshooni, H. Mirnejad & N. Rashidnejad-e-Omran

161

Source and evolution of fluids in the Shihu gold deposit, Taihang Mountains, China: evidence from microthermometry, chemical composition and noble gas isotope of fluid inclusions

Y. Cao, E. J. M. Carranza, S. Li, M. Yao & H. Zhang

177

Geochemistry: Exploration, Environment, Analysis (ISSN 1467-7873) is published in February, May, August and November by the Geological Society Publishing House the Geological Society, London and the Association of Applied Geochemists.

Subscription rates 2012 (volume 12, 4 parts): All correspondence relating to trade subscriptions should be addressed to the Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (Tel: +44 (0) 1225 445046; Fax: +44 (0) 1225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2012 to institutions and non-fellows are GEEA Online: £215 +VAT (UK), £243/US\$487 (overseas) or GEEA Online+print: £242 +VAT (UK), £274/US\$548 (overseas). The current tax rates (for UK and European Union subscribers) and more information can be found on <http://www.geolsoc.org.uk/LyellCollection>.

Periodical postage paid at Middlesex, N.J. *Postmaster:* send address changes to *Geochemistry: Exploration, Environment, Analysis*. The Geological Society, c/o Pronto Mailers, PO Box 177, Middlesex, NJ 08846.
