

# Journal of Micropalaeontology

Volume 15, Part 1, April 1996

## CONTENTS

1. **Palaeocene-Eocene deep water agglutinated foraminifera from the Numidian Flysch (Rif, Northern Morocco): their significance for the palaeoceanography of the Gibraltar gateway**  
M. A. Kaminski, W. Kuhnt and J. D. Radley 1
2. **Precise chitinozoan dating of Ordovician impact events in Baltoscandia**  
Y. Grahn, J. Nölvak and F. Paris 21
3. **Foraminiferal assemblages from the late Lower and Middle Cenomanian of Speeton (North Yorkshire, UK): relationships with sea-level fluctuations and watermass distribution**  
S. F. Mitchell 37
4. **Dipoflagellate cyst distributions and the Albian-Cenomanian boundary (mid-Cretaceous) at Cordebugle, NW France and Lewes, southern England**  
B. A. Tocher and I. Jarvis 55
5. **Lithofacies-influenced ostracod associations in the middle Ordovician Bromide Formation, Oklahoma, USA**  
M. Williams and D. J. Siveter 69
6. **Holothurian sclerites from the Triassic of Jordan and their stratigraphic importance**  
W. Sadeddin 83

---

## MICROPALAEONTOLOGY NOTEBOOKS

1. **Novel epifluorescence microscopy method to determine life position of foraminifera in sediments**  
J. M. Bernhard and S. S. Bowser 68
