

Scottish Journal of Geology

Volume 29, Part 1

Pages 1–112, 1993

CONTENTS

WHITEHOUSE, M. J. Age of the Corodale Gneisses, South Uist.	1
LEI SHIHE and PARK, R. G. Reversals of movement sense in the Lewisian brittle–ductile shear zones at Gairloch, NW Scotland, in the context of Laxfordian kinematic history.	9
STEWART, A. D. Late Proterozoic and late Palaeozoic movement on the Coigach fault in NW Scotland.	21
GLOVER, B. W. The sedimentology of the Neoproterozoic Grampian Group and the significance of the Fort William Slide between Spean Bridge and Rubha Cuil-cheanna, Inverness-shire.	29
DONOVAN, R. N. Evaporites in the Middle Devonian of the Orcadian basin near Berriedale, Caithness. . . .	45
MITCHELL, J. G., STORETVEDT, K. M., ROBSON, D. A., ABRANCHES, M. C. and INESON, P. R. Evidence for Carboniferous thermochemical overprinting in the Cheviot Complex. . . .	55
MORRIS, G. A. and HUTTON, D. H. W. Evidence for sinistral shear associated with the emplacement of the early Devonian Etive dyke swarm. . . .	69
HITCHEN, K. and RITCHIE, J. D. New K–Ar ages, and a provisional chronology, for the offshore part of the British Tertiary Igneous Province.	73
LIVINGSTONE, A. Glossary of Scottish mineral species—an update	87

DISCUSSION

KING, G. Linear independence of metamorphic reactions: Comment	103
BEDDOE-STEPHENS, B. Linear independence of metamorphic reactions: Reply.	104
