 administration 71–73
 crisis management 80–84
 evolution 73–77
 locations 72
 monitoring work 77–80
 public information work 84–88
- morphology of extrusive features 141–150
- Morris' village 429, 448, 451
- Mosquito Ghaut 15, 213, 237
 1997 pyroclastic flows 62, **176**, 192, 194, 195, 196, 198, 200, 202, 203, 283, 293
 block-and-ash flows 192, 231, 237
 co-pyroclastic flow plumes 486
 pyroclastic surge 237, 249
 rockfalls 235
- mud rain 523
- nucleation 158–159, **160**
- numerical modelling
 conduit flow 308–316
 equations 159, 168–169
 parameters defined 154–158
 results 159–164
 conduit initial conditions 320–334, 344–345
 video record and model compared 334–342
 current velocities 431–432
 debris avalanche emplacement 401–402
 deformation 398–401
 dome pressurization and fragmentation 458–462
 eruption behaviour 159–164
 parameters employed **160, 310, 325**, 519, 604–605
 particle transport 462–463
 seismic waves 603–609
 stratified density current 463–464
 tephra fallout 518–536
- obituary xiii–xv
- Old Road Bay 428, 430
- olivine 99
- orthopyroxene 51, 55, 99, 156, 186, 283, 496
- overpressure of magma 59, 60, 156, 160, 162, 164, 224–225
- Pan-Caribbean Disaster Prevention and Preparedness Program 18, 19
- Paradise Ghaut 257
- Paradise River valley 265
- particle aggregation *see* aggregation
- particle size
 ash plumes 205, 327–342
 avalanche deposits 391–392, 393
 flow deposits
 block-and-ash 203, 242, 244
 pumice-and-ash 247
 pyroclastic density current 441, 444, 445, 448–450
 pyroclastic surge 203–205, 250, 255
 surge-derived pyroclastic flow 205, 206, 273, 275
 tephra 484, 500–504, 519, 526
 particle transport modelling 462–465
- Pea Ghaut 196, 198, 200
- Perches Mountain 5, 45, 94, 97, 116, 476
⁴⁰Ar/³⁹Ar geochronology 105, 106
 petrology 99
- permeability of magma 157–161, **160**
- phenocrysts 51, 55, 64, 99, 156, 186, 496
 effect of concentration 139–140
 size effect on eruption 162
- phreatic phase 567
 explosions 9, 13–14, 24, 485
 monitoring 567–579
- plagioclase 51, 55, 99, 156, 186, 243, 283, 496, 508, 510, 512
- plate tectonic setting 2
- plumes *see* ash plumes *also* tephra fallout
- Plymouth 41, 52
 fan 256
 pumice-and-ash flows 244, 247
- ponding in pyroclastic density current deposits 439, 442
- porosity of eruption products 60, **157**, 167
- pressures
 associated with magma chamber 156
 in conduit in explosions 303–304
