**Geological Society reviewing procedures**

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Memoir or Special Publication can be found on the Society's web site: [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

It is recommended that reference to all or part of this book should be made in the following way.

# THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

**The Geological Society Publishing House** (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from [www.geolsoc.org.uk](http://www.geolsoc.org.uk)) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult [www.geolsoc.org.uk](http://www.geolsoc.org.uk), or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

For information about the Society's meetings, consult *Events* on [www.geolsoc.org.uk](http://www.geolsoc.org.uk). To find out more about the Society's Corporate Affiliates Scheme, write to [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

## Contents

<b>Acknowledgements</b>	<b>vii</b>		<b>47</b>
<b>Chapter 1 Introduction</b>	<b>1</b>		
History of Research 1811–1969	2		
<b>Chapter 2 Stoer Group</b>	<b>5</b>		
Stratigraphy	5		
Basement topography, drainage & weathering	5		
Facies and environments	6		
The Stac Fada sequence	9		
Geochemistry	11		
Palaeomagnetism	18		
Palaeoclimate	18		
Basin analysis	19		
Age and correlation	21		
<b>Chapter 3 Sleat Group</b>	<b>23</b>		
Stratigraphy	23		
Facies and environments	23		
Geochemistry	24		
Weathering and palaeoclimate	27		
Basin analysis	27		
Age and correlation	27		
<b>Chapter 4 Torridon Group</b>	<b>29</b>		
Stratigraphy	29		
Basement topography and drainage	29		
Unconformity weathering	31		
Facies and environments	32		
Geochemistry and mineralogy	35		
The nature and location of the source rocks	39		
Palaeomagnetism	42		
Weathering and palaeoclimate	43		
Basin analysis	43		
Age and correlation	45		
		<b>Chapter 5 Overview</b>	<b>47</b>
		Depositional style	47
		Burial history	47
		Palaeomagnetism and palaeogeography	49
		<b>Chapter 6 Directory</b>	<b>53</b>
		Cape Wrath	53
		Handa	54
		Ben Dreavie	54
		Quinag	55
		Rubha Stoer	56
		Stoer, Clachtoll and Clashnessie	57
		Enard Bay	71
		Loch Veyatie to Canisp and Suilven	73
		Inverpolly Forest	74
		Isle Ristol to Badentarbat and the Summer Isles	75
		Achiltibuie	76
		Cailleach Head	78
		Scoraig	81
		Stattic Point	84
		Gruinard Bay	86

## **Acknowledgements**

The writer is grateful to the following researchers who have generously given time to read and comment on parts of the text: H. Emeleus, F. Fraser-Menzies, R. E. Holdsworth, E. Irving, B. E. Leake, P. Nicholson and G. M. Young. Particular thanks are due to the three referees, A. R. Prave, P. M. Smith and N. J. Soper, who

had the onerous task of reading the entire text, and detected more than a few dubious assumptions and murky arguments. Acknowledgement is also due to the University of Chicago and R. C. Selley for permission to use the copyright material contained in Figures 38 and 107.
