Special requests should be addressed to the Editor. The Geological Society Publishing House, Yorkshire Geological Society and the Editors do not accept any responsibility for the views and opinions expressed by individual authors in the *Proceedings*. **USA Mailing statement:** *Proceedings of the Yorkshire Geological Society* (ISSN 0044-0604) is published twice a year (May and November) for \$109 by the Geological Society Publishing House, Unit 7 Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK. Periodical postage paid at Middlesex, NJ. Postmaster: send address changes to *Proceedings of the Yorkshire Geological Society* c/o PO 177 Middlesex, NJ 08846.

Proceedings of the Yorkshire Geological Society (ISSN 0044-0604) is published twice a year (May and November) by the Geological Society Publishing House. Each Volume comprises 4 Parts and spans 2 years. Trade subscription enquiries should be addressed to the Journal Subscription Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK.

Prices for non-members: Volume 51, Parts 3 & 4 subscription £65.00 (US\$109.00). Single copies £38 (US\$62).

Cumulative index to volumes 38–50

DAVID McMAHON

2 Isles Cottages, Low Road, Richmond, North Yorks, DL11 6NG

PREFACE

This index is a collation of the indexes to volumes 38–50; it is not a re-indexing. The principle followed has been to retain all entries from individual volumes even though this introduces variations in the level of detail; it reflects the variations to be found between volume indexes.

Over the period 1970–1995, the style of the indexes also varied. The one adopted here is based on the indexes to volumes 45–50. The most significant difference is that the names of authors and of contributors to discussions have been listed in a separate *Author Index*. In addition, *Localities* and *Minerals* have been integrated into the *General Index*, Society matters have been separated from it and igneous rock units placed under *Lithostratigraphy*.

Usage for authors' names varies greatly between volume indexes. The format adopted here is to capitalise only the first letter of a surname and to place initials after it. In cross references author's initials are omitted and where papers have more than two authors the names of those other than the first are referred to as *et al.*

Where taxa were listed separately in the volume indexes, only new taxa have been so listed, and established taxa have been transferred to the *General Index*. For those volumes with less detailed indexes, references were not given for some established taxa and no attempt has been made to rectify this.

An index for volumes 1 to 25 (1836–1946) was published as volume 26 in 1948. This is in abbreviated form (59 pp) and lists *Authors*, *Titles of Papers*, *Obituaries* and *Bibliographies of Yorkshire Geology*. A cumulative index covering volumes 27 to 37 (1947–1970) was issued with volume 37.

This cumulative index has been compiled by David McMahon with the assistance of Iain Burgess, David Millward and Colin Scruton.

D. W. Holliday
President

CONTENTS

	Page
1. Author index	3
2. General index	11
2.1. Boreholes	23
2.2. Chronostratigraphy	24
2.3. Lithostratigraphy (including igneous rocks)	26
2.4. New taxa	31
2.5. Society Business (including Annual Reports, Society Activities, Awards, Obituaries, Field Meeting Reports and Volume Indexes)	32
