

## **Scottish Journal of Geology**

The primary aim of the *Journal* is to publish original papers on Scottish geology, but other topics of general or specialist interest are acceptable. Contributions should not normally exceed 12 journal pages; shorter papers are likely to be published more rapidly. 'Short Communications' of up to four pages need not be preceded by a 'synopsis'. Discussions of papers that appear in the *Journal* are invited and will be published quickly. Review papers are welcome, but authors contemplating submitting these should, at an early stage, contact the editorial board to discuss content, suitability and possible date of publication.

### **Instructions for contributors**

Detailed instructions for contributors are published in the *Scottish Journal of Geology* Volume 29, Part 1, pp. 107-11. Intending authors must ensure that the format of their contributions complies with these instructions, as this will enable processing of the contributions with the minimum possible delay. Please note that periodical titles are now printed in full.

**Discs:** Discs of word-processed papers will be requested by the editor when the paper is accepted. Do not send the disc until requested to do so. Further details are available from the Staff Editor.

All correspondence, typescripts and proofs should be addressed to The Editors, Scottish Journal of Geology, c/o Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN.

Copies of the instructions can be obtained by writing to The Editors, Scottish Journal of Geology, c/o British Geological Survey, Murchison House, West Mains Road, Edinburgh EH9 3LA.

### **Back issues**

Certain back numbers of the *Transactions of the Edinburgh Geological Society*, *Transactions of the Geological Society of Glasgow* and *Scottish Journal of Geology* are still available. A list of the prices and parts may be had on application to the secretaries of the Societies.

### **Book reviews**

As space permits, the *Journal* will publish independent reviews of printed works that have a clear relevance to the geology of Scotland.

# INDEX

Volume 32, 1996  
Authors

- ALLWRIGHT, E.A. 83–9  
BALLANTYNE, C.K. 107–15  
BELL, B.R. 117–26  
BENNETT, M.R. 97–105  
CLARKSON, E.N.K. 133–49  
DAHL, S.-O. 107–15  
DEMPSTER, T.J. 173–7  
EMELEUS, C.H. 83–9  
FLINN, D. 67–82, 151–8  
GOODMAN, S. 159–72  
GUNN, A.G. 33–49  
HARPER, A.T. 133–49  
HEAD, F.E. 117–26  
HEENEY, P.J. 1–8  
IKEDA, T. 179–84  
JACKSON, R.A. 173–7  
JOHNSTON, D.R. 51–8  
JOLLEY, D.W. 117–26  
KERR, A.C. 83–9  
KEY, R.M. 67–82  
KHOO, T.T. 67–82  
LAPPIN, M.A. 159–72  
LAWSON, T.J. 59–65  
LINTERN, B.C. 1–8  
MAY, F. 9–21  
MCCARROL, D. 107–15  
NESJE, A. 107–15  
OWEN, A.W. 133–49  
PANHUYS-SIGLER, M. VAN 127–32  
PHILLIPS, E.R. 9–21  
ROLLIN, K.E. 33–49  
RUSHTON, A.W.A. 23–32  
SCRUTTON, C.T. 91  
STEPHENSON, D. 33–49  
STILL, J. 127–32  
STONE, P. 1–8  
STYLES, M.T. 33–49  
TREWIN, N.H. 127–32  
TRIPP, R.P. 23–32  
TUNNICLIFF, S.P. 23–32  
WILLIAMS, T.M. 1–8  
WILLIAMSON, I.T. 83–9, 117–26

## Subjects

- Albany Group 23–32  
appinite, Glas Bheinn 9–21  
Assynt, glacial evidence 59–65  
biotites, sodium-rich 173–7  
book reviews 93–5, 185–90  
brachiopods, Ordovician 133–49  
Broadford Gabbro 51–8  
Caledonian contact metamorphism 159–72  
chloritoid schists of Shetland 67–82  
Clift Hills Phyllites 67–82  
contact metamorphism *see* thermal metamorphism  
coral, Ordovician 91  
Creag Strollamus 51–8  
Dalradian  
  deformation analysis 179–184  
  metasediments 173–177  
deformation analysis 179–184  
Devensian  
  erosion 107–115  
  glacial landforms 97–105  
  ice sheet evidence 59–65  
Devonian, Gamrie Bay 127–32  
dunite, Shetland 151–8  
Dunrossness Phyllites 67–82  
foliation, Glas Bheinn appinite 9–21  
fossils, Ordovician 23–32, 91  
gabbro  
  Broadford 51–8  
  Shetland 151–8  
Gala Group 1–8  
Gamrie Bay (Moray Firth) 127–32  
geochemistry, Lower Palaeozoic turbidites 1–8  
Girvan 23–32  
glacial studies  
  altitude estimates 107–15  
  landforms 97–105  
  striae 59–65  
Glas Bheinn Complex 9–21  
Glen Roy 9–21  
graptolites, Ordovician 23–32  
gravity anomaly 33–49  
Hawick Group 1–8

Hebrides, Inner 83–9  
 Huntly 33–49

Iapetus Ocean closure 1–8

igneous processes  
 intrusive 9–21, 51–8, 151–8  
 volcanic 117–26

Inner Hebrides 83–89

Kilbucho, coral find 91  
*Kilbuchophyllia clarksoni* 91

landform analysis 97–105

lavas, Palaeocene 117–26

Leadhills Group 1–8

Loch Level Antiform 179–84

Loch Lomond Stadial 97–105

Lochnagar Complex 159–72

Mamore Syncline 179–84

metagabbro 33–49

metamorphism  
 regional 33–49  
 thermal 67–82, 159–72

micas, sodium-rich 173–7

mineralogy  
 Lochnagar aureole 159–72  
 Succoth–Brown Hill Complex 33–49

modelling thermal overprinting 159–72

Old Red Sandstone, Gamrie Bay 127–32

Ophiolite Complex, Shetland 151–8

Ordovician  
 conglomerate 133–49  
 coral 91  
 faunal analysis 23–32  
 turbidite geochemistry 1–8

Palaeocene  
 Inner Hebrides 83–9  
 Skye 117–26

palaeogeography, Ordovician 23–32

pelitic schists, Angus 173–77

periglaciation, Skye 107–15

petrology, Glas Bheinn appinite 9–21

rare earth element signatures 1–8

reduction spots 127–32

roscoelite 127–32

schists  
 Angus 173–7  
 Shetland 67–82

Shetland  
 Ophiolite Complex 151–8  
 chloritoid schist 67–82

Silurian  
 igneous activity 9–21  
 turbidite geochemistry 1–8

Skye  
 Broadford Gabbro 51–8  
 Devensian glaciation 107–115  
 Palaeocene lavas 117–126

Southern Uplands  
 Ordovician conglomerate 133–49  
 turbidite geochemistry 1–8

Succoth–Brown Hill Intrusion 33–49

Tertiary  
 intrusives 51–8  
 lavas 83–89, 117–26

thermal metamorphism  
 Lochnagar 159–72  
 Shetland 67–82

trilobites, Ordovician 23–32, 133–49

tuffs, Palaeocene 83–89

turbidites, geochemistry 1–8

ultramafics 33–49

weathering, periglacial 107–15

Windermere Supergroup 1–8

Wrae Limestone 133–49

Younger Dryas 97–105
