GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 100

Salt Tectonics

EDITED BY

G. I. ALSOP, D. J. BLUNDELL & I. DAVISON

Department of Geology, Royal Holloway
University of London, UK

1996

Published by
The Geological Society
London

THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as The Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a membership of around 8000. It has countrywide coverage and approximately 1000 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house, which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists, SEPM and the Geological Society of America

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' relevant experience in geology or a cognate subject. A Fellow who has not less than five years' relevant postgraduate experience in the practice of geology may apply for validation and, subject to approval, may be able to use the designatory letters C Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society,

Acknowledgements

We would like to thank the following companies that sponsored this meeting: BP, Conoco (UK), Enterprise Oil, Esso (UK), and Ranger Oil (UK). This meeting was convened and supported by the Petroleum and Tectonic Studies Group of the Geological Society. The following people acted as referees for the papers submitted to this volume, and we thank them for their considerable efforts which have improved this publication.
