Special Publications reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Science Citation Index, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

WINCHESTER, J. A., PHARAOH, T. C. & VERNIERS, J. (eds) 2002. *Palaeozoic Amalgamation of Central Europe*. Geological Society, London, Special Publications, **201**.

COCKS, L. R. M. 2002. Key Lower Palaeozoic faunas from near the Trans-European Suture Zone. *In*: WINCHESTER, J. A., PHARAOH, T. C. & VERNIERS, J. (eds) 2002. *Palaeozoic Amalgamation of Central Europe*. Geological Society, London, Special Publications, **201**, 37–46.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 201

Palaeozoic Amalgamation of Central Europe

EDITED BY

J. A. WINCHESTER

Keele University, UK

T. C. PHARAOH

British Geological Survey, Notts, UK

and

J. VERNIERS

University of Ghent, Belgium

2002

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG; Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; Email: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

WINCHESTER, J. A., PHARAOH, T. C. & VERNIERS, J. Palaeozoic amalgamation of Central Europe: an introduction and synthesis of new results from recent geological and geophysical investigations	1
Biostratigraphic/provenance evidence	
BELKA, Z., VALVERDE-VAQUERO, P., DÖRR, W., AHRENDT, H., WEMMER, K., FRANKE, W. & SCHÄFER, J. Accretion of first Gondwana-derived terranes at the margin of Baltica	19
COCKS, L. R. M. Key Lower Palaeozoic faunas from near the Trans-European Suture Zone	37
VERNIERS, J., PHARAOH, T. C., ANDRÉ, L., DEBACKER, T., DE VOS, M., EVERAERTS, M., HERBOSCH, A., SAMUELSSON, J., SINTUBIN, M. & VECOLI, M. The Cambrian to mid Devonian basin development and deformation history of Eastern Avalonia, east of the Midlands Microcraton: new data and a review	47
SAMUELSSON, J., VECOLI, M., BEDNARCZYK, W. S. & VERNIERS, J. Timing of the Avalonia–Baltica plate convergence as inferred from palaeogeographic and stratigraphic data of chitinozoan assemblages in west Pomerania, northern Poland	95
SAMUELSSON, J., GERDES, A., KOCH, L., SERVAIS, T. & VERNIERS, J. Chitinozoa and Nd isotope stratigraphy of the Ordovician rocks in the Ebbe Anticline, NW Germany	115
Isotopic constraints	
MARHEINE, D., KACHLÍK, V., MALUSKI, H., PATOČKA, F. & ŽELAŽNIEWICZ, A. New $^{40}\text{Ar}/^{39}\text{Ar}$ ages in the West Sudetes (Bohemian Massif): constraints on the Variscan polyphase tectonothermal development	133
CROWLEY, Q. G., TIMMERMANN, H., NOBLE, S. R. & HOLLAND, J. G. Palaeozoic terrane amalgamation in Central Europe: a REE and Sm–Nd isotopic study of the pre-Variscan basement, NE Bohemian Massif	157
Petrological and geochemical evidence	
CROWLEY, Q. G., FLOYD, P. A., ŠTĚDRÁ, V., WINCHESTER, J. A., KACHLÍK, V. & HOLLAND, J. G. The Mariánské Lázně Complex, NW Bohemian Massif: development and destruction of an early Palaeozoic seaway	177
FLOYD, P. A., KRYZA, R., CROWLEY, Q. G., WINCHESTER, J. A. & WAHED, M. A. Ślęza Ophiolite: geochemical features and relationship to Lower Palaeozoic rift magmatism in the Bohemian Massif	197
ŠTĚDRÁ, V., KACHLÍK, V. & KRYZA, R. Coronitic metagabbros of the Mariánské Lázně Complex and Teplá Crystalline Unit: inferences for the tectonometamorphic evolution of the western margin of the Teplá–Barrandian Unit, Bohemian Massif	217
Structural evolution	
ALEKSANDROWSKI, P. & MAZUR, S. Collage tectonics in the northeasternmost part of the Variscan Belt: the Sudetes, Bohemian Massif	237
FRANKE, W. & ŽELAŽNIEWICZ, A. Structure and evolution of the Bohemian Arc	279

Seismic traverses and deep crustal structure

GRAD, M., GUTERCH, A. & MAZUR, S. Seismic refraction evidence for crustal structure in the central part of the Trans-European Suture Zone in Poland	295
SCHECK, M., THYBO, H., LASSEN, A., ABRAMOVITZ, T. & LAIGLE, M. Basement structure in the southern North Sea, offshore Denmark, based on seismic interpretation	311
SINTUBIN, M. & EVERAERTS, M. A compressional wedge model for the Lower Palaeozoic Anglo-Brabant Belt (Belgium), based on potential field data	327
Index	345
